Profile

Mid Level Web Developer with 2+ years of experience building responsive websites and web applications. Proficient in React.js, JavaScript, and CSS frameworks like Bootstrap and ChakraUI. Passionate about creating user-friendly interfaces and improving web performance. A proven track record of using my exceptional web development skills, excellent communication and organization skills to lead and improve web applications across over 5 countries, tackle persistent bugs, and improve code efficiencies

Experience

Backyard Automobiles Limited (checkbackyard)
Web Developer

- Developed and deployed the company website based on Figma designs, achieving **100% responsiveness** across devices and browsers.

- Built and integrated a **"Request Car" form** with a connected database for efficient data collection and management.

- **Hosted and maintained** the website, ensuring consistent uptime and smooth performance.

- Leveraged **Next.js** for server-side rendering, resulting in **faster load times**, improved **SEO performance**, and optimized **overall user experience**.

Say Foods Plc (sayfoods.co)

Full-Stack Web Developer

- Designed and developed the company website and an integrated online marketplace with full cart and product management systems.

- Built both the frontend and backend, ensuring seamless communication between all components.

- Developed an admin panel that allows managing both frontend content and backend operations directly.

- Handled deployment, hosting, and ongoing maintenance of the entire platform.

- Integrated **Paystack** payment infrastructure for secure and efficient online transactions.

Skills

Programming Languages: HTML | CSS | JavaScript | SCSS | TypeScript
Web Frameworks/Libraries: Chakra UI | WordPress | React | Bootstrap | Angular | Next.js.
Databases: MySQL| MongoDB | Firebase.
Tools: Postman | Figma | GIT/GitHub .

Education

Bachelor of Science Computer Science (In View)
University Of Lagos | Lagos, Nigeria.
Relevant Coursework: Web design and Development | SQL

Projects

The Movie Database([TMDB](#))
 Full-Stack Web Application

- Designed and developed a movie information platform using **React.js**, **HTML**, **CSS**, and **JavaScript** for the front end.

- Built the back end with **Node.js** and **Express.js**, implementing **user authentication**, **search functionality**, and **API integration**.

- Integrated the **TMDB API** to fetch and display dynamic movie data, including details, ratings, reviews, and cast information.

- Utilized **MongoDB** for data storage and management, supporting user profiles and movie data caching.

- Implemented a **recommendation engine** to suggest movies based on user preferences and viewing history.

- Collaborated with a cross-functional team of developers, designers, and testers to ensure a seamless user experience.

- Ensured **responsiveness** and optimized **performance** across devices and browsers.

- **Deployed** the application to a live server, making it accessible to users globally.

Nairaland ([Clone](#))
Full-Stack Web Application

- Developed a **modern clone of Nairaland**, one of Nigeria's largest online discussion platforms, using **React.js** and **Tailwind CSS** for a clean, responsive UI.

- Implemented **Node.js** and **Express.js** for the back end, handling post creation, comments, and user management.

- Integrated **MongoDB** for database operations, storing threads, posts, and user information efficiently.

- Added **authentication and authorization** features, enabling users to sign up, log in, and engage securely.

- Optimized the site for **speed and scalability**, with responsive layouts and smooth page navigation.

- Deployed the client application on **Vercel** for seamless global accessibility.
